

I am an XM Satellite Radio subscriber and wish to express my concern with the FCC and reject NAB's petition 04-160. Satellite radio is a subscription service for those who willing to purchase. The petition to limit the service would be an injustice to the reason subscribers purchase the service. I'm paying not to hear commercials and disc jockey talk or at least less of it. Remember, we live in a free enterprise society, let's keep it that way.
